PROFESSIONAL SUMMARY

Entry-level Data Analyst with a B.E. in Information Science & Engineering, skilled in SQL, Python, Power BI, and DAX. Built an interactive sales and profitability dashboard with 15+ DAX measures and MoM/YoY analysis, plus a Snowflake and dbt pipeline that delivers tested, analytics-ready data. Combines data modeling, KPI design, and data quality practices to turn raw data into clear business decisions.

TECHNICAL SKILLS

Programming & Querying: SQL, Python, C

Analytics & Visualization: Power BI, DAX, Power Query, MS Excel, KPI Design, Time Intelligence (MoM/YoY)

Databases & Data Modeling: Snowflake, MySQL, Data Modeling, ETL Pipelines, dbt, SCD Type 2

Cloud & Tools: AWS (S3), Git, GitHub, Docker, UiPath, MS Office

PROJECTS

Sales & Shipment Analytics Dashboard | Power BI, DAX, Power Query, Data Modeling | [Link](#)

- Built an interactive Power BI dashboard analyzing sales, shipments, cost, and profit for a chocolate manufacturer across regions, products, and salespeople.
- Modeled 5 tables (shipments, calendar, products, people, locations) and wrote 15+ DAX measures (DIVIDE, PREVIOUSMONTH, PREVIOUSYEAR, LASTDATE) for profit margin, MoM/YoY growth, and latest-month KPIs.
- Added a dynamic KPI selector, region slicers, bookmarks, custom tooltips, a salesperson leaderboard, and a light-box shipment gauge (under 50 boxes) to surface top regions and reps and track cost efficiency.

Airbnb Data Engineering Pipeline | Snowflake, dbt, AWS S3, Python | Jan 2026 – Feb 2026

- Engineered a Bronze → Silver → Gold Medallion pipeline that loads Airbnb listings, bookings, and hosts data from AWS S3 into Snowflake as analytics-ready datasets.
- Developed dbt incremental models and SCD Type 2 snapshots, plus fact and One-Big-Table (OBT) models with lineage tracking and dependency management.
- Enforced data quality with dbt tests (unique, not-null, referential integrity, business rules) and tuned performance using Snowflake warehousing, clustering, and ephemeral models.

Docent: AI Document Assistant (RAG) | Python, FastAPI, LangChain, ChromaDB, Next.js, Docker | [Link](#) | [Demo](#)

- Developed a full-stack RAG assistant in 7 days that answers questions only from uploaded PDF/Markdown files, with clickable page and heading citations.
- Built the retrieval pipeline (LangChain chunking, embeddings, ChromaDB) with a no-answer fallback that prevents hallucination, supporting OpenAI, Anthropic, and Gemini models.
- Secured a FastAPI backend (10+ REST endpoints) with JWT and Google OAuth authentication and per-user data isolation, deployed on Render as 3 Docker Compose services.

EDUCATION

B.E. in Information Science & Engineering | P.E.S. College of Engineering, Mandya | 2025 | CGPA: 7.8/10

Diploma in Computer Science & Engineering | Government Polytechnic College, Ramanagara | 2021 | CGPA: 8/10

CERTIFICATIONS & PUBLICATIONS

- NPTEL Certifications (Python Programming, IoT & Cloud Computing) | [Link](#)
- TCS iON Certification | [Link](#)
- Cyber Security Fundamentals (Zscaler) | [Link](#)
- Published ML Paper | [Paper](#)
